 Fairfax, Virginia

 [daven-chang](https://www.linkedin.com/in/daven-chang)

## SUMMARY

Passionate about software development and machine learning with a growing interest in Generative AI. Expansive Python skills and experience developed through countless personal projects. Comfortable with other programming languages. Collaborative team player with a strong work ethic and a passion for learning and growth.

## SKILLS

**Languages:** Python, Java, C, C++, Mojo, HTML, CSS, Javascript, Arduino.

**Technologies:** VSCode, Git, Linux, Numpy, Pandas, Tensorflow, Keras, OpenCV, PyTorch, Matplotlib, Mediapipe, Flask, Typing, RegEx.

## EDUCATION

|                  |   |                |
|------------------|---|----------------|
| 8/2023 - Present | <b>CS/ML @ University of Maryland College Park</b><br>Researcher in the the FIRE research program in Sustainability Analytics. Member of the BigThink AI club, and the Taiwanese American Student Association (TASA). | <b>School</b>  |
| 7/2023 - 8/2023  | <b>Inspirit AI - AI Scholar</b><br>Built cifar-10 classifiers with KNNs and CNNs. Combined NLP and DNN through LSTMs, RNN, and transformers, to predict stock prices from news and market history.                    | <b>Program</b> |
| 6/2023 - 6/2023  | <b>BWSI - COGWORKS</b><br>Completed pre-requisite course on Autonomous Cognitive Assistants. Learned version control with Git, and advanced knowledge of Python and NLP techniques.                                   | <b>Program</b> |

## PROJECTS

|           |  |   |
|-----------|--|---|
| Hackathon | <b>Helping Hands</b><br>Developed a program that utilizes computer vision and the onboard webcam to allow users to move, click, and scroll the mouse remotely using their hands. Used Python, mediapipe, cv2, numpy, pyautogui.  | <a href="https://devpost.com/software/helpinghands-myl8ox">https://devpost.com/software/helpinghands-myl8ox</a> |
| Website   | <b>davenc.dev/website</b><br>Started work on a personal website as a way of learning HTML, CSS, and JavaScript. Learned networking principles such as DNS, IP addresses, and http/tcp as well. Planning to incorporate Nodejs and other frameworks   | <a href="https://davenc.dev">https://davenc.dev</a>   |
| Personal  | <b>DigitGAN</b><br>Created, trained, and fine-tuned GANs in pytorch capable of generating images of numbers similar to the MNIST dataset. Tested both Deep Neural Networks and Convolutional Neural Networks to improve performance.   | <a href="https://github.com/daven-c/DigitGAN">https://github.com/daven-c/DigitGAN</a>                           |
| Personal  | <b>Digit Classifier</b><br>Created and trained a Convolutional Neural Network with keras to identify a digit drawn on a grid-based UI created using pygame. Included a system of easily saving and loading the best models.  | <a href="https://davenc.dev">https://davenc.dev</a>   |
| Personal  | <b>A Star Visualizer</b><br>Created a grid-based visualizer which includes the ability to place obstacles on a board consisting of a start and end tile. Once run, the program searches for the best path around the obstacles from the start tile to end tile using the A Star pathing algorithm. | <a href="https://github.com/daven-c/A-Star-Visualizer">https://github.com/daven-c/A-Star-Visualizer</a>         |

## EXPERIENCE

|                  |  |                                 |
|------------------|--|---------------------------------|
| 2/2023 - Present | <b>Freelance</b> <ul style="list-style-type: none"><li>Developed first paid website, jewel-inthelotus.com.</li><li>Developed automated discord bots that managed servers, initiated events, created games, and boosted member interaction.</li><li>Built mock games including 2048 and Snake using the pygame library.</li></ul> |                                 |
| 8/2021 - 6/2023  | <b>Tutor</b> <ul style="list-style-type: none"><li>Tutored students ranging from K-10 in core subjects including math, science, history, and english.</li><li>Tutored every Wednesday and Sunday.</li></ul>  | <b>Fairfax Regional Library</b> |

## COURSEWORK

- Intro to Object Oriented Programming I/II, Data Structures and Algorithms, Intro to Computer Systems, Discrete Structures, Organization of Programming Languages, Algorithms, Calculus I/II, Linear Algebra.
